

K-Love Radio serves my family well in Salem, Oregon by providing a positive influence when we listen. It always broadcasts clean programming that we can trust. It encourages its listeners to be positive, to help others, and to love its neighbors.

If K-Love were to be replaced by other programming my community would suffer. Its citizens would not find the same encouraging words to help them through their day. They would lose a positive force in their daily lives. Our community would be listening to more counter productive programming that promotes selfishness and degrades our morality.

K-Love programming is in the public's interest because it saves us money. Promoting positive encouragement, high moral standards, and love always works to bring out the best in people. If K-Love encourages one person to not commit a crime, to not steal, or to help someone in need it fosters an environment of health, help, and security that saves taxpayers money by not destroying things but building things up.

We love K-Love and hope it stays on the air for many years to come. Thank you.
